Skills

PHP Training

Web Standards: HTML5, CSS3, Javascript

Frontend: jQuery, Bootstrap

MySQL

openSUSE Linux (Desktop/Servidor)

AngularJS

Zend Framework

Slim Framework

Codeigniter

Doctrine

PHP Developer since 2005, Systems Analyst, Database and Hosting Server Management. Interest in analysis and development of systems and / or web sites, mobile technology and back-end and front-end. Among my professional characteristics I highlight my commitment, dedication, responsibility and professional ethics, always seeking knowledge and experience in new technologies in the IT field.

As of 2012, with the improvement of my knowledge in GNU / Linux Operating System, I started to install and configure file and print servers for small businesses and LAMP web servers (Linux, Apache, MySQL, PHP). Today I maintain some GNU / Linux servers that run applications developed by me to serve customers from different areas.

Since 2016 I have been developing integrated solutions to third party systems, using API REST, integration with payment gateways. I have used tools for automation and dependency management and system like Composer and Git.
